

TAP CHANGER FOR TRANSFORMER

Silverstone Electric +

Silverstone Electric is a dedicated provider of transmission lines and power transformation solutions across the Pan Asia-Pacific region. We specialise in manufacturing and servicing top-quality equipment for contractors, municipalities, power utilities, telecom companies, and other institutions globally.

With our state-of-the-art factories, extensive knowledge, and industry experience, we are equipped to meet our customers' OEM needs. As "Your Premium Electric Equipment Supplier," we are committed to delivering products of superior quality at competitive prices. Our stringent quality assurance systems ensure complete customer satisfaction.

Our comprehensive range includes fuse cutouts, drop-out fuses, lightning and surge arresters, composite and porcelain insulators, disconnect switches, cable accessories, transformers (pad mount, pole mount, distribution, and power transformers), switchgear, relay protection and battery charger panels, as well as offering EPC contracting services for substations up to 132kv.

Contact us today to discover how Silverstone Electric can provide tailored solutions for your needs, or explore our products on our website.

Feature of Off-Circuit Tap - Changer / SSE-WST Series

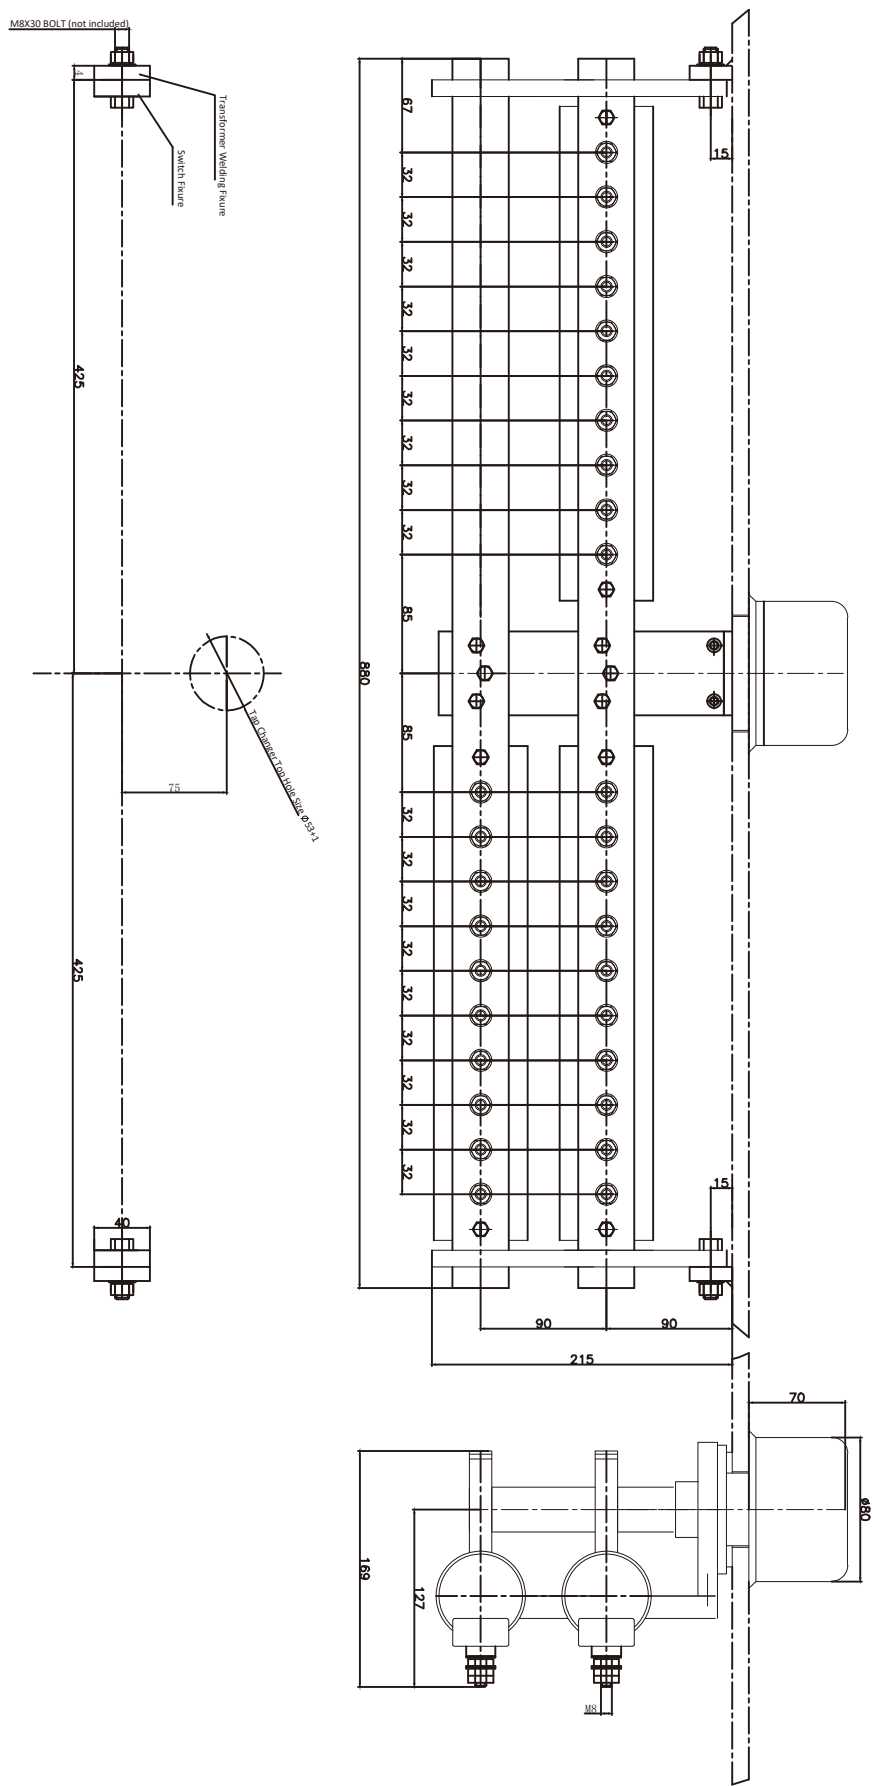

SSE-WST Series Off-Circuit Tap Changer is constituted with a strut structure. The maximum rated through-current is 800A for single phase and 630A for three phase. Voltage range for equipment is from 10kv to 132kv. The Tap Changer is applicable on both 50 and 60Hz frequency system, and it is capable for single and three phase oil-immersed transformers for power, rectification, furnace, testing and traction purposes.

Main Technical Data

Application	Oil immersed power, rectification, furnace and traction transformers	
Phase	Three-phase	Single-phase
Frequency	50/60Hz	50/60Hz
Max. Rated Through-Current	630A	800A
Rated Voltage Range for equipment	10 - 66kV	10 - 132kV
Max. Tapping Steps	11	11
Driving mode	Manual	
Remark:
